

F-35 LIGHTNING II ADVANCED TRAVEL POD

The next generation
of **fighter travel pods**

**JUST
ARRIVED.**

A fighter jet is shown flying through the letters of the word 'ARRIVED' in the main title. The jet is positioned behind the 'R' and 'I' of 'ARRIVED', appearing to fly through the opening of the letter 'I'. The background of the letters is a sky with clouds.

LIGHTER. EASIER. BETTER.

Currently en route to obtaining SEEK EAGLE certification, KIHOMAC's F-35 Advanced Travel Pod offers a replacement for the legacy MXU-648 travel pod.

The new design incorporates decades of first-hand maintainer experience, upgrading key features to increase both the capabilities of the pod as well as usability.

Patent Pending.

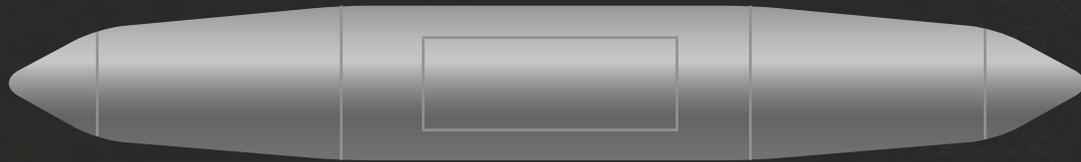

With a composite construction and a shape specifically designed for the internal carriage space of the F-35, the advanced travel pod more than doubles the usable volume and weight capacity while cutting the empty pod weight by 40%.

The new pod design offers handles, roll-prevention feet, an integrated tie-down system, and increased accessibility over the legacy pod.

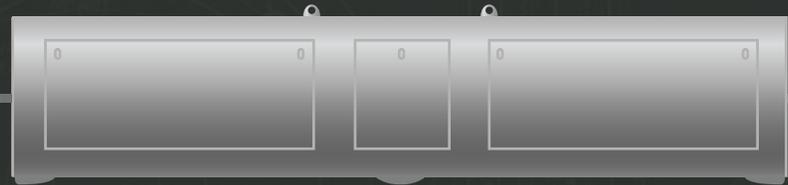

POD COMPARISON

MXU-648 (Legacy Pod)

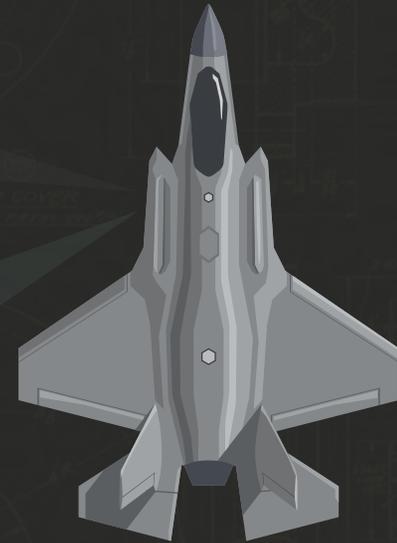

10.75 ft

KIHOMAC F-35 Advanced Travel Pod

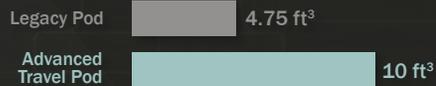

7.5 ft

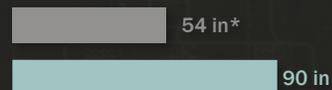

F-35 Internal Carriage

USABLE VOLUME
