

## TECHNICAL DATA DEVELOPMENT (TECHNICAL MANUALS)

### Experienced Personnel, Precision Documents

Our team of capable technical writers includes many former and retired aircraft maintainers with decades of experience. Together with our capable illustrators, KIHOMAC is well equipped to handle both generative and modernization-oriented data development. We have developed, certified, support-verified, and delivered technical manuals for a wide array of platforms, including C-5, A-10, OC-135, KC-135, ground support and test equipment.

We understand how to communicate and provide clear, safe, and accurate maintenance & operating instructions.
